## Here's how it works:

Survey Optimizer is a Mobile Data Collection App that sends data wirelessly to your cloud-based database. You'll be able to manage critical information on a broad scale. Choose from the included library of over 30 survey templates or build your own survey. Transfer your surveys to your Apple mobile device for use in the field. Use the Mobile App to collect and enter data directly. Say goodbye to handwritten forms and data entry after the fact.

## Survey Optimizer Features:

- Cloud-based — upload data wirelessly to the cloud
- Instant data entry — no more handwritten notes
- Minimal setup and training
- Built-in Survey Templates
- Multiple scoring options
- Location lists — track where surveys are conducted
- Control access with user groups
- Instant reporting
- Live tech support
- Build your own Survey Templates (such as Black Light and ATP Testing)
