Smart Facility™
Software

The cloud-based ES Technology used in over 950 hospitals.

I know because of ES technology.

Knowing your hospital is clean begins with knowing you have the right number of people.

The ES Optimizer staffing methodology includes room inventory technology, along with all the real-world variables such as lock-ins, patient turnover acuity, and every other challenge we face daily to calculate the correct number of ES staff required.

Built by ES managers, for ES managers.

Workflow Optimization

Trade hours in spreadsheets for minutes in ES Optimizer to optimize your workflow.

Staffing and Room Inventory • Daily Work Assignments • Schedule Project Work • Days-On/Days-Off • Census-Based Scheduling • Manage Employee Training • QA Inspections • Reporting

Mobile, Instant Workflow Management

Add this mobile companion to ES Optimizer. Assign tasks and track progress in real time with cloud-based task management technology.

Digital Daily Task Lists • Assign Scheduled and Non-Scheduled Tasks • Technicians Log Completed Work • Management Can Track Progress in Real Time • QR Code Scan and Texting Capabilities (see back for more info!)

I know my ES staff knows what to do.

Communicate your expectations digitally or on paper.

I know we are getting the job done.

Our technology collects technicians' logs to let you know what's happening, in real time.

I even know immediately when a customer requests service.

Our game changing capability lets any guest or staff member alert you immediately about cleaning issues they encounter in your facility.

Everyone else knows, too.

Your data is secure and at your fingertips. Reports are designed for every stakeholder, from HR/Unions to the C-Suite and your peers.

Game Changer

Post QR codes and text message signage anywhere.

Customer Service Requests

Any customer can use a smartphone (or other mobile device) to scan a QR code or send a text to submit service requests.

Scan this QR (Quick Read) code and try it yourself.

Technician Check-In & Check-Out

Use QR code or texting capability to see the assignments being done in real time. ES Technicians use a device for check-in and check-out at specified locations for work assignments.

Workflow Optimization

Optimize your workflow with a powerful technology package that lets you trade hours in spreadsheets for minutes in ES Optimizer.

Mobile, Instant Workflow Management

Add this mobile companion to ES Optimizer. Assign tasks and track progress in real time with cloud-based task management technology.

Any Survey, Any Time

The ultimate in flexibility lets you custom build any survey in minutes. Easily document and report your results.
